Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Response to Amendment

This Office Action is in response to applicant's amendment filed on January 5, 2005. Claims 25, 28 have been amended. Claims 30 and 31 are newly added claims. The claims, as indicated in the previous Office Action as having subject allowability matter, are regrettably withdrawn. Applicant's comments are acknowledged. The claims, as amended, are rejected in the following manner.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 9, 23, 24, 26, 27, and 31 are rejected under 35 U.S.C. 102(b) as being anticipated by Paturu (U.S. Patent No. 6,589,159). Paturu discloses in Figure 4 a condom (100) comprising a closed tip end (102) and an open end (104), the ends (102, 104) being joined by a continuous tubular sidewall (106). The sidewall (106) and closed end (102) comprise a thin durable rubber material in which magnetic particles have been embedded. Paturu further the condom incorporating a ring (108). Figure 4 further illustrating a rib at the open end (104). With regards to claim 31, cobalt demonstrating strong magnetic properties and is referred to as one of rare earth metal magnets. See column 1 lines 36-40 and column 5 lines 15-36.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 30 and 31 are rejected under 35 U.S.C. 103(a) as being unpatentable over Paturu (U.S. Patent No. 6,589,159). Paturu discloses in Figure 4 a condom (100) comprising elements are recited in this claim. With regards to cobalt and neodymium, as recited, applicant submitted in the specification on page 9 in the last paragraph stating that both of these are two of many known permanent magnets or high energy products and are available from Polymag, Inc. Therefore it would have been obvious to one skilled in the art to consider alternative products from Polymag, Inc. as such would not alter design, fit, performance, or comfort when use.

Double Patenting

The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

Art Unit: 3743

Claims 25, 28, and 29 are provisionally rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims of copending Application No. 10/417,274. Although the conflicting claims are not identical, they are not patentably distinct from each other because co-pending Application No. 10/417,274 anticipates the claims in application invention.

This is a provisional obviousness-type double patenting rejection because the conflicting claims have not in fact been patented.

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
